
Jake Januszanis

Software Developer

Denver, CO

Phone: (619)-961-3979 | Email: jjanuszanis94@gmail.com

Portfolio: jakejanuszanis.com | Github: <https://github.com/Jake-Januszanis/>

Summary

Software Developer with 2 years of experience. Well-versed in frontend technologies including Html, CSS, JavaScript, React, and React Native. Currently located in Denver, CO but willing to relocate for job opportunities.

Skills

Frontend: HTML5, CSS3, SASS, Tailwind CSS, JavaScript, TypeScript, React, React Native, Gatsby

Backend: NodeJS, Express, MongoDB, Mongoose

Other: Git, AJAX, REST, Heroku, Netlify, Adobe Lightroom, Figma

Work Experience

GoodBlock Technologies - React Developer (Contract)

Sept 2021 - Present

- Responsible for improving and adding new features to the user interface for the dStor decentralized cloud storage service
 - Efficiently researched and implemented solutions for any new bugs that were found
-

Projects

Flingo Movie App: <https://github.com/Jake-Januszanis/rn-movie-app-frontend>

- A mobile app that helps users discover new movies to watch based upon genres and their available streaming providers
- Main technologies used for this project: *Expo, React Native, Node.js, Express, Heroku*
- This project is not complete yet as I am still adding new features to provide a better UI/UX experience for the user

Weather App: <https://github.com/Jake-Januszanis/react-weather>

- Web app built using React for frontend and uses Express.js server on the backend to complete API calls and retrieve data

- App displays both the current forecast or a 5 day extended forecast for the user
- Code written using updated syntax including React hooks and JavaScript ES6 Async/Await functions to improve performance

Pomodoro Timer: <https://github.com/Jake-Januszanis/pomodoro-timer>

- Pomodoro timer built using HTML, SASS, JavaScript, and MongoDB
- App features register/login page with validation and hashed password security
- Users can save daily progress to the database in order to improve study time performance by comparing data from past dates

Gatsby Portfolio: <https://github.com/Jake-Januszanis/portfolio-v3>

- My personal portfolio was built using Gatsby, React, and Sass to showcase projects
- Designed for desktop but is fully responsive for all screen types
- BEM naming convention used within code for improved readability

Personal Achievements

- Successfully planned and achieved the Triple Crown of Hiking which entails hiking the entirety of the Appalachian Trail (2,187 miles), Pacific Crest Trail (2,653 miles), and Continental Divide Trail (~2,800 miles) within 5 years (2014-2019).
